

And, here's
just a few:

- Voice recognition
- Hands-free recording
- Courtroom proceedings
- Law enforcement interrogation
- Insurance claims
- Boardroom meetings
- Internet chat
- Music applications
- PC gaming

... and a countless number of applications where exactness is essential in the elimination of error!

Record with complete and total confidence

GN-3

for PC applications

A missed comment could result in a missed understanding. And, misunderstandings could have a resounding effect on the outcome of your dictated words. For that very reason, the GN-3 Professional Gooseneck, *multifunctional* Microphone is engineered with extraordinary and enhanced capabilities. This product is clearly a leading performer in voice communication technologies.

- ▶ Recommended for PC sound card recording applications.
- ▶ Features a weighted, non-skid, matte-finish base.
- ▶ Flexible 18 inch neck adjusts to an infinite number of positions for recording comfort.
- ▶ A uni-directional and noise-canceling microphone focuses on the clarity of your spoken word.
- ▶ Included windscreen further reduces ambient noise.

The 10 ft. detachable cord with 3.5 mm stereo plug offers great flexibility and multi-functional performance.
